

OUR SUCCESS STORIES

Jeroen Keessen, expert physical therapist and owner of Alliance PT in Newburgh, NY, has successfully treated my physical injuries since the winter of 2001 when I hurt my left knee while dancing. His treatment before the imminent surgery (I had a torn meniscus) helped to strengthen the area around the knee, and his well-orchestrated therapy following the surgery enabled me to heal quickly and completely. Pain-free, I went on a cruise just two weeks after the therapy ended. The next year I tore the meniscus in my right knee and once again returned to Jeroen for his expert treatment.

Besides the pre and post surgical treatments, I have gone to Alliance for shoulder and foot pain. Jeroen identified the problems and began light treatments. I followed up with visits to orthopedic surgeons who were amazed at my flexibility despite the injuries. In both cases, the doctors recommended that I continue with the obviously successful physical therapy regimen provided by Jeroen. As a result, the strength in both areas has improved so much that I have not needed to go for the surgeries. At age 59, I have the mobility of a 40 year old (according to Wii Fit!!) and I am doing pigeon and other poses in yoga that I never thought I'd be able to do.

Thank you, Jeroen, for your expertise and 100% attention during every course of therapy.

Dotty F.

New Windsor, NY

Colleen Moretto, not only an excellent PT but a well respected one. Colleen has a kind heart and puts all she has to make you back to yourself again. I would like to thank Colleen for everything she has done for me, during my time with her she made me feel so welcome. I also would like to thank Rocio "office manager" for all her help.

I went to Alliance Physical Therapy in August of 2008 from a car accident in 2007. Since the accident I had been to another PT office in Newburgh and they didn't treat my injuries correctly so I decided to move on and that was to Alliance PT, in Newburgh I am glad I did. I was treated at Alliance PT for Carpal Tunnel Syndrome, after having surgery on both hands, also for my back and neck injuries.

I hope everyone goes about there day in a safe way, but if you ever need Physical Therapy make sure you get to Alliance PT, Newburgh, NY The kind and caring place.

Thank you all

Sherry M,

Newburgh, NY
